

PROFILE

Highly motivated Front End developer changing careers after multiple years of owning and operating my own business. I have a passion for Front End development I specialize in React and TypeScript. With a great working knowledge in Back End technologies Node.js, MongoDB, Express.js

LANGUAGES/Frameworks/Tools/Skills

JavaScript (ES6), CSS, HTML, SQL, React, TailwindCSS, Node.js, Express, Next.js, TypeScript, Git, Github, JSON, Jest, GCP, Redux, Webpack, APIs, NPM, Firebase

PROJECTS

Microblog Platform — TypeScript, PostgreSQL, React, TailwindCSS, OAuth

A type safe social media site with reusable custom built React components, user authentication via OAuth. Using SQL functions the data for messages, responses, and likes is stored on a Supabase PostgreSQL database. I used TailwindCSS to create a responsive layout from mobile phones up to 4k monitors, included a dark mode based on user system preferences.

E-commerce Store — TypeScript, React, TailwindCSS

A type safe e-commerce store using a Shopify product API for test products. The store is complete through to the checkout process, featuring individual item pages using reusable React components, it has a fully responsive layout for mobile phone shopping experiences.
